

Angle bracket element 8 T1 40

Reference: WE8-T1-40

Material: Al

Surface: anodized

Color: natural color

m = 75.0 g

Angle bracket elements are well-suited for fastening one profile at an angle below 45° for constructing hitches and framework. They are mainly used for stiffening constructions. To cover the profile ends additionally orderable [Caps 8 40x40-45°, black](#) can be mounted. Double T-Slot nuts with two threaded holes are recommended for connecting fasteners.
