DATA SHEET

Angle bracket element 8 T1 40

Reference: WE8-T1-40

Material: Al Surface: anodized Color: natural color m = 75.0 g

Angle bracket elements are well-suited for fastening one profile at an angle below 45° for constructing hitches and framework. They are mainly used for stiffening constructions. To cover the profile ends additionally orderable <u>Caps 8 40x40-45°</u>, <u>black</u> can be mounted. Double T-Slot nuts with two threaded holes are recommended for connecting fasteners.
