

Angle bracket element 8 T2 40

Reference: WE8-T2-40

Material: Al

Surface: anodized

Color: natural color

m = 70.0 g

Angle bracket elements are well-suited for fastening two profiles at an angle below 45° for constructing hitches and framework. They are mainly used for stiffening constructions. To cover the profile ends additionally orderable [caps 8 40x40-45°, black](#) can be mounted. Double T-Slot nuts with two threaded holes are recommended for connecting fasteners.
