

Shaft clamp profile 8 D14 (cut)

Reference: WKP8-D14-Z

Material: Aluminum, EN AW 6063 T66

Surface: anodized, A6, C0

Color: natural color

$A = 1.36 \text{ cm}^2$

Cut max.: 3000 mm

Saw Cut Type B

$m = 0.36 \text{ kg/m}$

The shaft clamp profile is used to connect shafts D14 with the profile groove. After pressing the shaft clamp profile into the profile groove, the shaft is pressed in. The shafts can be fixed with a cylinder pin DIN 6325 in any position. For higher loads or greater accelerations, it is recommended to use heavy support profiles and to pin the shafts.
