

Angle bracket set V8 40 Zn

Reference: W-V8-40-ZN-SZ

Consists of:

Angle bracket V8 40 Zn, GD-Zn, white aluminum painted

2 T-slot nuts 8 St M8, galvanized

2 Countersunk screws M8x18, galvanized

m = 172.0 g

The angle bracket V8 40 Zn is used as connecting element for right-angled profile connections. It enables a force locked, unprocessed connection. The brackets have an anti-twist lock on the back, which positions them correctly in the profile groove. A set including screws and T-slot nuts for mounting on series 8 profiles is delivered.
