

Panel clamp 8

Reference: Z8-PA

Consists of:

2 Housing halves, PA-GF, black

Cap screw DIN912-M6x20, St, galvanized

Hexagon nut DIN934-M6, St, galvanized

2 Spacers, NBR, black

Load: $F_{\max} = 100 \text{ N}$

$m = 52.0 \text{ g}$

With the panel clamp panel elements from 2 - 10 mm thickness can be attached to the profile without additional processing. By tightening the clamping screws the panel clamp and the panel element are fixed. This type of fixing is particularly suitable for frameless panes.
