

Door stop 8, black

Reference: TS8

Consists of:

Door stop 8, PA-GF, black

Damper EPDM, 70 ShA

Groove fixing, GD-Zn

Countersunk screw M5x14, St, galvanized

Fixing piece PA-GF, black

m = 25.0 g

The door stop 8 is a flexible door rabbet made of plastic. It is attached to the door frame and simultaneously forms a ramp wedge and a damped limit stop. The immersion depth of the doors is limited to 40 mm. A door gap of 4.5 mm must be provided at the door stop. It can be attached to the profile groove 8 by separately orderable T-slot nuts 8 St M5.
