

Castor support 8 80x40

Reference: RSO8-80x40

Consists of:

Roller bracket St, aluminum-colored powder coated

Protective cap, TPE, grey

2 Button-head screws M8x16, St, galvanized

Countersunk screw M10x25, St, galvanized

2 Hole caps, PA, grey

m = 751.0 g

The castor support 8 80x40 allows D100 and D125 swivel castors to be securely attached to series 8 profiles. The castor support reduces the construction height and increases the safety against tilting due to a low center of gravity. The component is ideally suited for frontal mounting on a profile 8 80x40 using two M8 threads in the core bores. The castor support is shaped in such a way that the full swivel range of the swivel castors is guaranteed. Furthermore, an elastomer cap protects against damage and injury. Suitable fixing screws for series 8 are included.
