m = 2.636 kg

The castor swivel with lifting foot is the perfect solution for anything that has to be moved frequently and still needs to stand securely. The lifting foot is a combination of an adjustable foot with a swivel castor. Frequent movement on industrial floors is possible by mounting a swivel castor with lifting foot without any aids. It is attached to the profile groove 8 using cap screws M8x40 DIN 912 and body washers 8.4x24x3 DIN 522-A. A [fastening set](#) matched to the profile groove 8 is available.
