

Table-Top fastening set 8

Reference: TPB-8

Consists of:

Clamping piece, St, galvanized

Cap PA, black

Screw St 6x25-TX30, self-drilling, galvanized

m = 24.0 g

Table top fastening sets 8 are used for easy mounting of table tops (chipboard or multiplex boards, ESA boards with a minimum board thickness of 25 mm) on frame constructions with series 8 profiles. They are clamped and fixed in the profile groove by tightening the enclosed screw (TX 30 blade insert). It is not necessary to machine the table top.
