

Angle bracket 8 80 Zn, aluminum color
painted

Reference: W8-80-ZN

Material: GD-Zn

Surface: painted

Color: white aluminum RAL 9006

m = 410.0 g

The angle bracket 8 80 Zn enables a right-angled, friction-locked and machining-free connection of two series 8 profiles. Angle brackets Zn can be used as additional reinforcement for connections and as a fastening element for a wide range of attachments. The open side of the angle bracket can be closed by an additionally orderable [angle bracket cap](#).
