

Automatic-fastening set 12, galvanized

Reference: SS-VE12

Consists of:

Cutting sleeve 12 St

Cap screw M8x60

T-slot nut 12 St M8 with guiding ridge
(without cap)

Material: St

Surface: galvanized

M = 34 Nm

m = 135.5 g

Automatic-fastening set 12, galvanized are friction-locked connectors with the possibility of retrofitting and moving series 12 profiles. No additional profile machining is required to install the connector. The connector sleeve is screwed into a profile groove counterclockwise on the face side. The thread is self-tapping. A bit insert with width across flats AF6 is required to screw in the sleeve. It is recommended to use automatic-fastening screws in pairs.
