

T-slot nut 12 St M10 with guiding ridge,
galvanized

Reference: NS12-M10-STEG

Material: St
Surface: galvanized
M = 46 Nm
m = 33.0 g

T-slot nuts 12 St with guiding ridge are suitable for fastening medium-heavy components and for use in combination with fasteners. The T-slot nuts can be swiveled into the profile groove 12 in any position. The T-slot nut is fixed by a spring-loaded ball. The guiding ridge prevents the T-slot nuts from twisting in the profile groove and facilitates centered alignment.
