DATA SHEET

T-slot nut 12 St M6 with guiding ridge, galvanized

Reference: NS12-M6-STEG

Material: St Surface: galvanized M = 14 Nm m = 38.0 g

T-slot nuts 12 St with guiding ridge are suitable for fastening medium-heavy components and for use in combination with fasteners. The T-slot nuts can be swiveled into the profile groove 12 in any position. The T-slot nut is fixed by a spring-loaded ball. The guiding ridge prevents the T-slot nuts from twisting in the profile groove and facilitates centered alignment.
