

C-Rail, Bearing Unit 8 K

Reference: CS-LE-8K

Consists of:

C-rail, slide profile, Al, natural anodized

C-rail, slide profile cap set 8, PA-GF, black

C-rail, bearing set 8 K

Load: $F_{\max} = 250 \text{ N}$

$m = 485.5 \text{ g}$

The C-rail bearing unit 8 K is a pre-machined bearing unit for simple assembly of compact C-rail systems. The K variant is equipped with plastic rollers on plain bearings that run directly in the rail profile. This variant 8 K can be loaded with $F_{\max} = 250 \text{ N}$ and meets basic guiding requirements. In general, C-rail systems are variable and safe track roller guides and are designed in particular for the construction of lifting and sliding doors.
