

C-Rail, Bearing Set 8 K

Reference: CS-LS-8K

Consists of:

C-rail, slide plate, St, galvanized

C-rail, roller 8 K, PA, black

2 Countersunk screws M8x16, St, galvanized

Load: $F_{\max} = 250 \text{ N}$

$m = 172.0 \text{ g}$

The C-rail, bearing set 8 K is a pre-assembled bearing set for the individual construction of C-rail guides. Continuous slide profiles can be designed using C-rail, carriage profiles 8. The slide profiles must be machined accordingly to install the bearing sets. The dimension for the required fising holes is 90.0 mm. This variant 8 K with plastic rollers on plain bearings can be loaded with $F_{\max} = 250 \text{ N}$ and meets simple guiding requirements.
