

C-Rail, Bearing Unit 8 D14 1R

Reference: CS-LE-8D14-1R

Consists of:

C-rail, slide profile 8, Al, anodized

C-rail, slide profile cap set 8, PA-GF, black

C-rail, bearing set 8 D14 1R

Load: $F_{\max} = 750 \text{ N}$

$m = 579.5 \text{ g}$

The C-rail, bearing unit 8 D14 1R is used as a bearing unit for the self-assembly of C-rail systems. The pre-assembled units are equipped with wiper and lubrication systems as well as cover caps. The track roller used is durable and maintenance-free. In general, C-rail systems are variable and safe track roller guides and are especially designed for the construction of lifting and sliding doors. The C-rail, bearing unit 8 D14 1R can be subjected to a maximum tensile load of $F_{\max} = 750 \text{ N}$. To ensure that the bearing unit is secured against tilting, the use of two ground guide [shafts D14](#) is recommended.
