

C-Rail, Bearing Set 8 D14 1R

Reference: CS-LS-8D14-1R

Consists of:

C-rail, slide plate, St, galvanized

Roller D14, St, bright

2 C-rail, wiper and lubrication systems 8 D14

2 Countersunk screws M8x16, St, galvanized

Load: $F_{\max} = 750 \text{ N}$

$m = 264.5 \text{ g}$

The C-rail, bearing set 8 D14 1R is used as a bearing set for self-assembly of C-rail, bearing units. To attach the bearing sets to the C-rail, slide profile 8, countersunk holes for the fixing screws must be drilled 64.0 mm apart. The position of the holes is marked by a scribed line in the slide profile. In general, C-rail systems are variable and safe track roller guides and are designed in particular for the assembly of lifting and sliding doors. The pre-assembled track rollers are durable and maintenance-free. The C-rail bearing set 8 D14 1R can be subjected to a maximum tensile load of $F_{\max} = 750 \text{ N}$.
