

Cable entry protector wall 40, black

Reference: DF-W40

Material: PA-GF  
Color: black  
m = 5.0 g

In modular cable ducts in combination with wall and support profiles, cable entry protectors enable cables to be laid safely and easily. The cable entry protectors cover the sharp cut edges of the wall profiles and allow cables and hoses to be safely routed out. This allows wall profiles to be interrupted at any point.
