

Corner-Fastening Set Clamp-Profile 8 32x18

Reference: KP-EV-32x18

Consists of:
Corner connection set 32x18, GD-Al, painted, white aluminum
2 Button-head screws ISO 7380-M5x16, St, galvanized
m = 27.5 g

The clamp profile corner connection set 8 32x18 is suitable for stable connections of clamping profiles 8 32x18. It is mainly used for light protective enclosures and maintenance doors. It is necessary to insert an M5 thread into the core holes of the profiles. Furthermore, the corner connection sets offer the possibility of accommodating a special 8 32x18 roller insert. This creates a smooth-running sliding door from one frame.
