Black anodized profiles impress with their special appearance. The surface is pickled and black (satin matt) anodized (E6, C35). This makes the profiles scratch-resistant and corrosionprotected. The hard anodized coating also ensures a particularly low-burr saw cut. Due to the small design of Profile 5, they are particularly suitable for small and weight-optimized applications. The grooves and core holes are designed for screws of size M3 to M5. Series 5 also focuses on the functionality of the modular principle.
