

Protective profile 8 40x16, black (2 meters)

Reference: SP-8-40x16-S2

Material: TPE

Color: black

Length: 2000 mm

m = 332.5 g/m

The protective profile 8 prevents damage and injuries. Furthermore, the elastic hollow cavity profile made of TPE protects the profile edges from damage and can also be used as impact protection. Protective profiles are pressed directly into the profile groove 8 and lock automatically. If desired, elastic caps can be mounted to close the hollow chambers. Protective profiles are manufactured in increments of 40 mm.
