

Direct-fastening set 8 90° central

Reference: DV-90-Z

Material: St
Surface: galvanized
M = 8 Nm
m = 18.0 g

The direct-fastening set 8 90° central enables a right-angled connection of profiles. The profile strut can be rotated and fixed in any way. The pre-assembled direct-fastening sets are designed for light applications. For mounting an M8x18 thread into the core hole of the base profile is required. The fastening screw of the fastening set is tightened by angle wrench AF4 in the counter slot.
