

Double-lip seal 8 4-6 TPE, black (20 meters)

Reference: EP8-4-6-R20

Material: TPE  
Color: black  
c = 4.0 - 6.0 mm  
Length: 20 m  
m = 50.0 g/m

The double-lip seal 8 4-6 mm TPE, black is suitable for inserting safety glass and panel elements into the profile groove. Panels with a thickness of 4 to 6 mm are completely enclosed within the profile groove. The double-lip profile dampens vibrations, prevents direct contact with the aluminum profile and seals the groove. For installation it is recommended to place the double-lip profile on the panel element and wet it with soapy water.
