

Beech multiplex 20 mm painted (cut)

Reference: FE-B-MP-20-Z

Thickness: 20.0 mm

Material: Beech

Surface: painted

Cut max.: 2470 x 1270 mm

Cut: DL-S-FE-MP12-30

m = 14.7 kg/m²

Multiplex panels are used as surface elements for the construction of shelves, tables and other operating equipment. In particular, they are suitable as robust worktops. Wood is a natural product. The veneer of a panel may differ in grain and color. The varnishing of plates is done after cutting (edges varnished). Connection processing such as cut-outs or radii are available on request.
