## **DATA SHEET**

Beech multiplex 8 mm painted (cut)

Reference: FE-B-MP-8-Z

Thickness: 8.0 mm Material: Beech Surface: painted Cut max.: 2470 x 1270 mm Cut: DL-S-FE-MP8-10 m = 5.9 kg/m<sup>2</sup>

Multiplex panels are used as surface elements for the construction of shelves, tables and other operating equipment. In particular, they are suitable as robust worktops. Wood is a natural product. The veneer of a panel may differ in grain and color. The varnishing of plates is done after cutting (edges varnished). Connection processing such as cut-outs or radii are available on request.
