

PET-G 6 mm clear (cut)

Reference: FE-PET-G-6-K-Z

Thickness: 6.0 mm, +/-4%

Material: PET-G

Color: clear

Cut max.: 3020 x 2020 mm

Cut: DL-S-FE

$m = 7.7 \text{ kg/m}^2$

PET-G is a impact resistant, clear plastic that is used, for example, for construction of machine housings and protective fences. The material is suitable for indoor and outdoor use. Connection processing like drillings, apertures or radii are possible on request. Panes made of PET-G are resistant to chemicals and easy to clean.
