

Hanger 8

Reference: AH8

Consists of:

Hanger, GD-Zn, black

Cap screw DIN 912-M6x16, St, galvanized

Washer DIN 125-6,4, St, galvanized

Load: $F_{\max} = 750 \text{ N}$

$m = 88.0 \text{ g}$

The hanger 8 is used to attach frame elements to stand profiles. The suspensions can be screwed to each other and secured against being unhinged. For each connection point two hangers 8 are required. Furthermore the additionally orderable [fastening set 8 for hanger 8](#) are recommended for mounting. The gap dimension between frame and stand profile amounts 25 mm.
