

Hinge 8 40x40 with clamp lever

Reference: G8-40x40-KH

Consists of:

Hinge 8 40x40, GD-Zn, white aluminum painted
RAL 9006

4 Fixations, GD-Zn, galvanized

Clamp lever M8x40, black

m = 381.0 g

Hinges with clamp lever are suitable for connecting profiles at any angle. Apart from that, they can also be used as heavy hinges or for connecting various attachments (e.g. a monitor). By tightening the clamp lever the hinge can be locked in any position. The supplied fixings allow the hinge to be fixed to the profile groove without twisting. For connection to the profile groove additional orderable half-round screws ISO 7380 and T-slot nuts are recommended.
