

Monitor workstation 8, 4 axes, height-adjustable

Reference: MAP8-4A-75-100

Material: St, Al, PA-GF

Color: grey

Load: $F_{\max} = 80 \text{ N}$

$m = 10.08 \text{ kg}$

The monitor workstation 8, 4 axes, height-adjustable is used to mount monitors with a weight of 2 to 8 kg. A monitor is mounted using a VESA 75/100 mounting plate. Suitable mounting screws are included. The 4-axis adjustment option enables optimum adjustment of a wide range of viewing angles and working heights. The monitor workstation also offers a wrist rest that is easy on the joints, a keyboard rest that can support a load of up to 2.5 kg and a shelf for a mouse that can be pulled out to the left and right. It is mounted on the profile slot 8 using a 360° rotatable mounting flange, which is also included.
