

## Fastener D30 Al

Reference: V-D30-AL

Consists of:

2 Connector halves, GD-Al, bright  
Cap screw DIN 912, M6x28, St, galvanized  
Hexagon nut DIN 985 (self-locking), St,  
galvanized  
m = 89.5 g

The fastener D30 is suitable for right-angled connections of profile tubes of the D30 series. The pre-assembled fastener is clamped from the outside by a socket head screw M6 (AF5). By tightening the fastening screw, a permanent hold is ensured by positive locking on the profile tubes. The tightening torque of the fastening screw is  $M = 10 \text{ Nm}$ . The maximum holding force against displacement is  $F_z = 500 \text{ N}$ . The intended immersion depth of the profile tube in the fastener is 20 mm.
