

Multiblock D30 Al

Reference: MB-D30-AL

Consists of:

- 2 Multiblock halves, GD-Al, bright
- 2 Cap screws DIN 912, M6x20, St, galvanized
- 2 Hexagon nuts DIN 985 (self-locking), St, galvanized
- Square nut DIN 557, M6, St, galvanized
- m = 72.5 g

The multiblock D30 Al offers the possibility of mounting panel elements or any accessories quickly and securely. The asymmetrical design enables a flexible mounting at two different installation heights. The multiblock D30 is clamped from the outside by two socket head screws M6 (AF5). A permanent hold on the profile tube D30 is ensured by tightening the fastening screw. The multiblock is delivered as a set and includes the necessary mounting set. This makes the component immediately ready for service. The tightening torque of the fastening screw is $M = 10$ Nm. If required the screw points can be closed with additionally orderable [Cap D30 flat, grey](#).
