

Roller Conveyor St, Support D30

Reference: RB-ST-D30-UST

Consists of:

Castor conveyor St support D30, St, galvanized
4 Button-head screws self-drilling DIN 7504
3,9x16, St, galvanized
m = 42.0 g

The roller conveyor St support D30 offers the possibility to connect roller conveyors St D30 with cross braces made of profile tubes D30 in case of higher loads. This enables to support roller conveyors and to minimize any deflection. Furthermore, the component prevents lateral displacement of the roller conveyors. Thus, the workpiece carriers or transport containers remain on track. To simplify assembly, the roller conveyors engage automatically in the retaining glugs of the support. The support can additionally be fixed and secured with the drilling screws included in the scope of delivery.
