

Roller Conveyor St D30, grey (2 meters)

Reference: RB-ST-D30-G-S2

Consists of:

Castor conveyor profile, St, galvanized

Castors, PP, grey similar to RAL 7042

Axles, St, galvanized

Length: 2000 mm

m = 823.0 g/m

The roller conveyor St D30 is a ready to install and light running castor rail D30. The pre-assembled roller conveyor can be cut to the required length. Due to a lot of receptacles, the roller conveyor can be mounted easily and without any further processing to frame constructions made of profile tubes D30. The used steel axles and light-running cylindrical rollers ensure a long service life. The maximum permissible force on a single castor is  $F_{\max} = 100 \text{ N}$ .
