The profile tube D30 Al heavy is the ideal series D30 profile for heavy-duty applications. The special geometry of the profile tube with four undercuts enables the D30 connection technology to be connected. The connectors can be mounted in all four directions and moved along the longitudinal grooves at any time. The form locking fasteners ensure a secure and permanent hold. The surface of the profile tubes D30 is natural color anodized and protects against scratches. On request, the profile tubes can be cut to the required length.
