

Roller Conveyor St D30 with Flanged Wheel, grey (cut)

Order number: RB-ST-D30-G-SP-Z

Consists of:

Castor conveyor profile, St, galvanized

Castors with flange, PP, grey similar to RAL 7042

Axles, St, galvanized

Cut max.: 2.000 mm

$m = 775,0 \text{ g/m}$

The roller conveyor St D30 with flanged wheel is a ready to install and light running castor rail D30. The pre-assembled roller conveyor can be cut to the required length. Due to a lot of receptacles, the roller conveyor can be mounted easily and without any further processing to frame constructions made of profile tubes D30. The used steel axles and light-running cylindrical rollers with flange ensure a long service life. Furthermore the flanged edges of the cylindrical rollers keep the transported material on track and ensure a smooth running. The maximum permissible force on a single castor is $F_{\max} = 100 \text{ N}$.
