

Cable entry protector lid 40, black

Reference: DF-D40-SZ

Material: PA-GF  
Color: black  
m = 7.0 g

In modular cable ducts, especially when used with wall and support profiles, cable entry protectors enable cables to be laid safely and easily. They cover the sharp cut edges of the support and lid profiles and allow cables and hoses to be safely routed out. This allows support profiles as well as lid profiles to be interrupted at any point.
