

Cap 8 80x40 ESD, black

Reference: AK8-80x40-ESD

Material: PA-GF, electrostatically conductive

Color: black

m = 13.3 g

Cover caps 8 ESD, black are suitable for covering profile ends. The caps improve the appearance, help to avoid injuries from cuts and prevent dirt from entering. Caps PA are easy and quick to mount and it is no longer necessary to deflash profile cut surfaces. Integrated anti-twist locks ensure a secure hold. The ESD version is conductive and prevents electrostatic charging of the material.
