

Magnetic door stop 8, black

Reference: MA8

Consists of:

Housing, PA-GF, black

Insert plate, GD-Zn, bright

Stop plate, St, galvanized

2 Countersunk screws DIN 7991, M5x14,
galvanized

Compensation insert, PA-GF, black

Load: Holding power $F = 30 \text{ N}$

$m = 53.0 \text{ g}$

The magnetic stop 8 is used to limit and hold swing doors in place. As soon as a door comes in contact with the stop bracket, it is stopped and held in place by an integrated holding magnet. The holding force per magnetic door stop amounts 30 N. A door gap of 6.0 mm must be provided for installation. The component is designed for series 8. Suitable fixing screws are included.
