

Bracket 8 160x40, black

Reference: LCH8-160x40

Material: St

Surface: powder coated

Color: black

m = 222 g

The bracket 8 160x40 is a stable fastening element made of steel. With four fixing holes, it offers the possibility of connecting several profiles or other attachments to each other or mutual. For fixing to the profile groove, the separately orderable [fastening set for bracket / lug](#) can be used. A total of two fastening sets are required for the 160x40 version.
