

Sliding-door guide profile 8 40x20 bottom  
(6 meters)

Reference: STFP8-U-S6

Material: Aluminum, EN AW 6063 T66

Surface: anodized, A6, C0

Color: natural color

$A = 3.43 \text{ cm}^2$

Length: 6000 mm

$m = 0.93 \text{ kg/m}$

The sliding-door guide profile 8 40x20 top is suitable for the use of sliding doors within frame constructions or racks made of series 8 profiles. The guide profile is attached to series 8 profile grooves using the separately orderable [Clip 8 St, galvanized](#). The sliding door guide profile forms the basis for guiding up to three panel elements with a material thickness of 8 mm. The top and bottom variants allow easy installation of the panels. The height of the panel elements is calculated using the formula  $a-28 \text{ mm}$  ( $a$  = clear width of the frame construction).
