## DATA SHEET

LED-light 1342

Reference: SYSTEMLED-1342

Cover: Microprisms Length: 1342 mm Power: 60 Watt

Protection class: IP50, protection class 1 Light color: Daylight white 5,700K 3-step

MacAdam

Beam angle: 90°

Connection: 230V - AC (GST18)

Telefon: +49 84 63 603 63-0

Fax: +49 84 63 603 63-11

m = 4.822 kg

The robust LED-light is specially designed for system workstations. It is connected via the standard GST18. The power supply unit (230V) is installed directly into the LED-light. In addition, the light offers homogeneous, glare-free and flicker-free illumination. From an economic point of view, it is particularly energy-efficient. The LED-light is also designed for 60,000 operating hours and is also maintenance-free. An on/off switch is attached to the housing. The LED-light can be easily mounted on the profile groove using a separately orderable <u>fastening set</u>. Suitable connection cables are available.
