

Corner deflector guard 8 St 160x160x80,  
galvanized

Reference: LES8-ST-VZ

Material: St  
Surface: galvanized  
m = 0.898 kg

The corner deflector guard 8 St 160x160x80, galvanized, helps prevent damage to transport trolleys. It acts as a bumper and protects the base frame. Since collisions cannot be completely avoided during internal transport, the additional impact protection minimizes maintenance and repair costs. The additionally orderable [fastening set](#) is recommended for mounting on the profile groove 8.
