

TCS running rail (cut)

Reference: TCS-LS-Z

Material: Al

Surface: anodized

Cut max.: 6000 mm

Saw Cut Type TCS-S

m = 1.03 kg/m

The running rail makes it easy to install sliding doors. Using the running rail ensures that sliding doors move smoothly, quietly, and very reliably. The profile is designed for a maximum door weight of 90 kg. Note: To ensure safe running, a sliding door must always be guided at the top and bottom.

The following components are available as matching accessories: [TCS dual running gear](#), [TCS buffer, adjustable](#) and [TCS suspension bolt](#)
