

L-based foot 8-12 240x100

Reference: WSTF-8-12-240x100

Consists of:

L-based foot 8-12 240x100

Cap, PA, black

Material: GD-Zn

Surface: painted

Color: white aluminum

m = 1.713 kg

The L-based foot 8-12 240x100 is designed for securing frame structures to the floor. Thanks to its slotted holes, the L-based foot can be bolted to vertical or horizontal profile grooves in the base structure. The design of the foot safely absorbs loads and guarantees optimal support. For fastening, a separately orderable [floor-fastening set M12x145, galvanized](#) can be used. For mounting to the profile groove 8, [button-head screws M8x20, galvanized](#) and [washers 13,5x9x1, galvanized](#), are recommended.
