

Crane plate 8 80x80 M16, galvanized

Reference: KP8-80x80-M16

Material: St
Surface: galvanized
m = 705.0 g

The crane plate 8 80x80-M16, galvanized is a solid and break-proof steel plate. It is suitable for fixing eyebolts of size M16 to machine frames. Lateral forces resulting from lifting can be absorbed by the crane plate and transferred to the base frame. Additionally orderable cap screws of size M8x25 are recommended for fastening to the aluminum profile.
