

Clamp profile-cross connector 8 40x40

Reference: KP-KV8-40x40

Immersion depth of the surface $a = 15+1$ mm

Material: GD-Zn

Surface: painted

Color: white aluminum RAL 9006

$m = 135.5$ g

The clamp profile-cross connector 8 40x40 offers the possibility to connect up to four series 8 clamp profiles. It is particularly suitable for cut-outs, openings and inside corners in profile frame constructions made of clamp profile. For assembly, a threaded hole M8x18 must be drilled into the core hole of the frame profiles. For mounting additionally orderable cap screws DIN912, M8x20, St, galvanized are required.
