

Bracket 8 40, stainless

Reference: LCH8-40-RF

Material: Stainless Steel (A2)

Surface: bright

m = 115.5 g

The bracket 8 40, stainless steel is a stable fastening element made of stainless steel (A2). With two fixing holes, it offers the possibility of connecting several profiles or other attachments to each other or mutual. For fixing to the profile groove, the separately orderable [fastening set for bracket / lug, stainless steel](#) can be used. The component is suitable for use in climate change chambers.
