T-slot nut 8 Zn M6

Reference: NS8-ZN-M6

Material: GD-Zn
Surface: galvanized
m = 4.0 g

T-slot nuts are suitable for efficient assembly of light components. A fixed thread is created by tightening the T-slot nut. The T-slot nuts Zn can be preassembled on the component to be fastened using a screw. After positioning the T-slot nut including with the screw in the profile slot, it locks automatically in the profile when tightened.
