

Grip rail profile (6 meters)

Reference: P-GL-S6

Material: Aluminum, EN AW 6063 T66
Surface: anodized, A6, C0
Color: natural color
Length: 6000 mm
m = 0.76 kg/m

Grip rail profiles are used for swing and sliding doors as well as for drawers and pull-outs. Furthermore, grip rail profiles have a stabilizing effect when attached to panel elements. An additionally orderable [grip rail cap set](#) provides an improved visual appearance, helps to prevent cuts and prevents the ingress of dirt.
